Rheumatologist – Dunedin – New Zealand
Submitted on: 20/08/2020, Reference number: 2020214
End date: 20/11/2020

Location:
Dunedin is a city located in the south of the South Island of New Zealand. The city has about 113,000 inhabitants, making it the second largest city on the South Island. Dunedin is a student city. The city has a typically Scottish appearance. Dunedin's street plan is almost identical to that of Edinburgh in Scotland. Dunedin is accessible by highway, it has a train station and an airport. It has a moderate climate, but there are different microclimates in the city, resulting in different weather conditions from district to district.

The position is offered by a tertiary care hospital with 350 beds. This hospital has close ties with the University of Otago School of Medicine, which means that this hospital also functions as an academic centre. In addition, this hospital has several locations, which means that care can be provided to a large patient population. The Rheumatology department mainly treats inflammatory arthritis patients with a high prevalence of connective tissue disorders and vasculitis. In addition, a wide range of imaging is performed here, including ultrasounds and nail fold video capillaroscopy. In addition to traditional diagnostic imaging techniques such as CT and MRI scans, the department has access to SPECT scans and a modern immunology laboratory. The team consists of six other rheumatologists.

Job Description:
On behalf of this hospital we are immediately looking for a rheumatologist for a part-time position (0.8 FTE). The working week will consist of 32 hours per week.

The successful candidate will work with the aforementioned team to treat a challenging patient population in a specialist centre. Furthermore, you will treat a diverse spectrum of inflammatory rheumatic diseases together with a multidisciplinary team. In addition, you will actively contribute to the education and training of medical personnel such as registrars and interns. You will also have the opportunity to be involved in a research program in which four PhD students are involved in conducting clinical research. The position is arranged in such a way that there is a balanced relationship between clinical and administrative tasks. There is an on-call roster of 1:4 in which the successful candidate will partake.

Preferably, candidates are sought who are enthusiastic about medical education.

Attractive terms of employment are offered. Excellent English language skills are required for registration in New Zealand. MMedical will assist you in obtaining all necessary registrations.

For Medical Professionals:
MMedical assists medical professionals in finding a job at home or abroad. Via MMedical you get a good overview of vacancies that match your preferences and within your area of interest. When required, we assist you in obtaining the necessary permits and visa.

We handle your personal data discreetly and do not share it with third parties without your permission. If you are interested in the vacancy above or if you are curious whether there are other vacancies in your field, please contact one of the employees of MMedical.
